

Eastern Whangamarino restoration

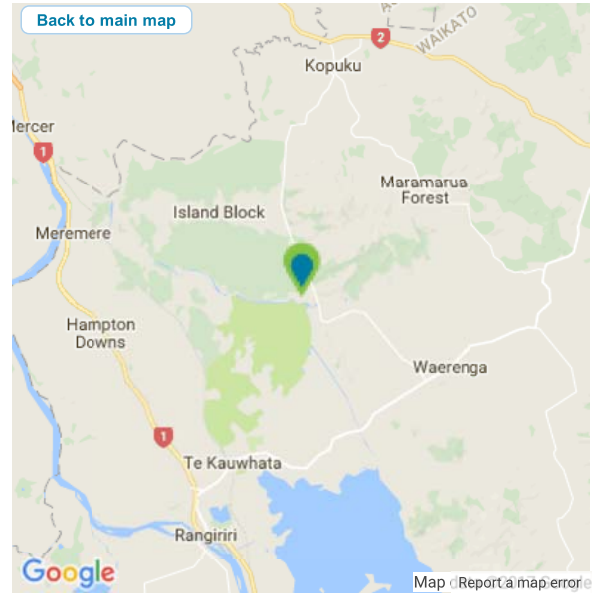

Auckland Waikato Fish and Game - Euan Williamson
 021 903 501
 euie@clear.net.nz

This is the last stage of a multi year project to restore the Eastern Whangamarino wetland.

This work completes a barrier forcing polluted farm run off down a series of silt traps rather than out into the swamp. It will finish the last three ponds (18 19 and 20) and associated banks and walkways. The result will be improved hydrology of the wetland and any water discharged from the swamp to the Waikato river is clean swamp water. This is a Waikato River Authority funded project (WRA 14-003)
