

Te Papa / Mangati whitebait habitat restoration project

Muir Family, Stu Muir
 027 279 1724
 akastu@ps.gen.nz

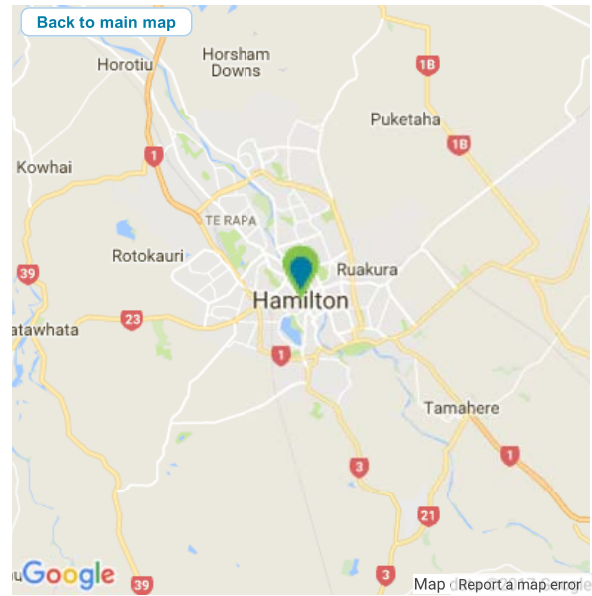

A continuation of whitebait habitat restoration work on the Muir farm property at Ake Ake

This year the project aims to complete construction of remaining ponds and connect access to the bank. Continue planting and maintaining the existing plantations. Continue fencing the existing sites along the Papa channel on the main farm.

The project also aims to create access between the restoration sites to further educational outcomes for primary to tertiary and post-grad students, and also to assist in the maintenance of the work that we have done, in particular weed and pest control.

This project received funding from the Waikato River Authority (WRA 15-017 , WRA 16-037, WRA 16-039).
