To Waikato Regional Council 06-05-2017
PC1 is uneconomic. It missed the brief of being environmental & economically sustainable. Therefore it fails. Hill country farmers will suffer. Rural communities will suffer. The plan had to be economically sustainable; it is not. Wasting 14 million dollars over the last few years is only the tip of the ice berg.

The issues with Waterways were identified years ago and a lot of practical results have already been achieved.

The land Air Water Action website & monitoring is good. Practical response to the data, concerning P, N, sediment & coli. ~~response~~ should be science based and measurable and achievable - not bureaucratic. Where land is over fertilized it should be able to be increased to sustainable levels. Where fert of any description is excessive, measure it in a lab and cut it back. Planting & protecting those plants (fencing) is practical & 97% achieved on dairy land. Funds should be diverted away from bureaucracy & redirected to hill country fencing / planting subsidies and get on with the job.

As a family we have contributed to the Ngāwai / Huraki Catchment since the 1910 ballot. on numerous committees, drainage boards, Lions club, Rowing club, Rugby club, supported schools & community we farm 225 hect of dairy / dry stock land. Operate Antartic service & health service. Provide commercial & residential accommodation, ie we need employ & house people as business people when we look at a project we ~~look~~ first look @ the merits. The first question after that is; where is the money coming from & is it sustainable?

I support clean water but Healthy Rivers - not!
We don't want to see PC2 on our side of the hill.

Regards Mike Speedy.
